GOKULRAJ P

Full Stack Developer

SUMMARY

Goal-oriented full stack developer with a passion for working on a project that solves problems with thoughtful UI design, creating intuitive, dynamic user experiences powered by a strong backend. I primarily work with the MERN stack among the full-stack technologies.

SELF PROJECTS

❖ Hotel Booking Application

- Implemented this application with a complete authentication system along with various roles (Admin, Client).
- Application system follows complete authentication for Login, Registration. Users can filter Rooms by using Hotel, City, and price.
- More than one user can't able to choose the room at a time. If room is booked by one user, if any other user tried to book that same room, it will not be display.
- Users can Check out added Hotel Rooms with Price Details.
- Admin can see entire hotel details and also delete and update the Hotels & Rooms.
- Deployed Link: [Preview](#)

❖ Blog Application

- Created Blog application where the users create and edit posts.
- Users can view posts based on the category or author name.
- Users can update their profile pictures.
- Only the Admin or owner of the post can perform edit or delete.
- Deployed Link: [Preview](#)
